Welcome TO OUR RANGE OF LUXURY HANDMADE IRONMONGERY & HOMEWARE.

At From The Anvil we specialise in manufacturing premium ironmongery, lighting and homeware. Our exclusive product collection offers bespoke styling with modern functionality. With over twenty-six years of experience, we combine traditional hot forging and anvil hammer work with modern technology to create the largest selection of handmade ironmongery in the UK. Our skilled blacksmiths use only high-quality base materials—including mild steel, brass, bronze, and marine-grade stainless steel—to craft our extensive collection. This comprehensive range of traditional and contemporary designs & finishes covers all interior aspects, giving you beautiful options to enhance your home while offering consistency throughout. Our collection comprises

over six thousand unique product lines. For any special product requirements our bespoke team will be happy to discuss individual requests. We are passionate about the products we create, using high-quality manufacturing to produce beautiful, functional products recognised for their exceptional quality and craftsmanship.

Our FINISHES

Our extensive range of beautiful finishes has been carefully curated over a number of years to cater to a large variety of property types and interior styles. With products from across our range of hand-crafted door, window and cabinet hardware, plus lighting and accessories, available in many of our most popular finishes, it's easier than ever to coordinate the hardware throughout your home, right down to the smallest detail.

At From The Anvil we offer an interior design and consultancy service to help guide you through your design choices and to get the right finish for your project.

"we take immense pride in creating luxury products that are as hardwearing as they are beautiful"

Aged **BRASS** - AB

FOR INTERNAL & EXTERNAL USE

A popular choice for Period homes and interiors; our Aged Brass finish offers a characterful warmth and works beautifully, creating a real statement when used with deep, dark paint colours, and materials & textiles synonymous with luxury and abundance.

Manufactured from solid, unlacquered brass, our Aged Brass products undergo an accelerated ageing process before surface areas are repolished, creating a striking contrast between the darker patina left around the edges and recesses, and brighter surface areas. As an unlacquered, 'living' finish Aged Brass will continue to oxidise, meaning it will darken over time. If the product becomes too dark or tarnished, it can be polished to restore the brighter finish on surface areas.

Burnished **BRASS** - BB

FOR INTERNAL & EXTERNAL USE

Burnished Brass is an excellent choice for those wanting to add subtle luxury to their home interiors. Offering warmth without over dominating, this timeless finish complements a range of colours, and looks especially stunning when paired with paler shades.

Hand forged from a base of solid brass, Burnished Brass is an excellent example of how our unique manufacturing techniques add further intrigue to the natural charm of the base material. Each product undergoes an accelerated ageing process, creating a dark patina before being placed into barrelling machines, giving them the beautiful burnished finish. During the final stages of manufacturing, a high quality, clear matt lacquer is applied for protection.

Polished **BRASS** - PB

FOR INTERNAL & EXTERNAL USE

Polished Brass is a classic finish most synonymous with use in traditional period properties and interiors, yet works well paired with light colours and subtle textural details to achieve a luxurious, more modern aesthetic.

Our Polished Brass products are manufactured from solid, unlacquered brass. Bright and reflective when polished, although as an unlacquered, 'living' finish it will continue to oxidise, meaning it will darken over time. If the product becomes too dark or tarnished, it can be polished to restore the brighter finish.

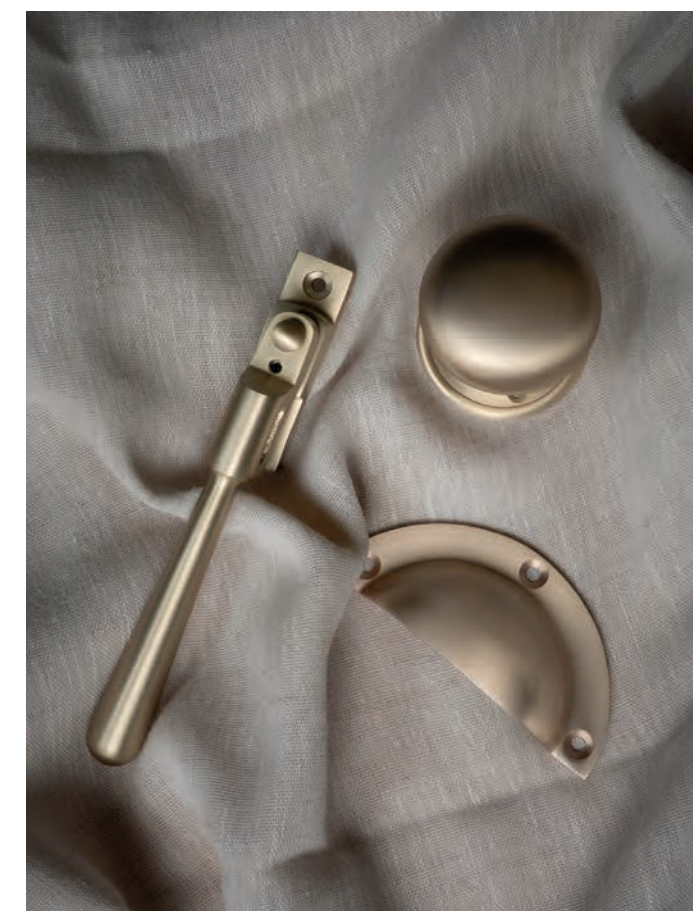

Satin **BRASS** - SB

FOR INTERNAL & EXTERNAL USE

Satin Brass offers a sophisticated and more contemporary alternative to Polished and Aged Brass. The rich, warm undertones, and matt look of this finish exude luxury and are perfect for creating a statement in any space. Best suited to more modern homes and interiors, it works well when paired with darker tones and colours.

Manufactured from solid brass, our Satin Brass products are brushed with a satin wheel during the final stages of manufacturing, giving them their distinctive, matt appearance, before a high quality matt lacquer is applied to the surface for protection.

Aged **BRONZE** - ABRZ

FOR INTERNAL & EXTERNAL USE

Aged Bronze is a versatile finish that's equally suited to interiors featuring lighter shades for bold contrast, or darker hues for a more subtle aesthetic. One of our most popular finishes, favoured for its rich, dark matt finish and distinctive warm undertones that sets it apart from every other finish in our range.

Our Aged Bronze products are made using solid bronze containing a minimum of 85% copper. The process used to age the metal is what gives it a dark, dramatic appearance, before a durable matt lacquer is applied during the final stages of manufacturing to help protect and preserve its distinctive tones.

Polished **MARINE** **SS (316)** - PSS

FOR INTERNAL & EXTERNAL USE

Our Polished Marine 316 Stainless Steel is a bright, high-shine finish well suited to a range of architectural styles. A versatile choice that looks especially striking when used against dark and dramatic hues, but also works when paired with a range of more subtle colours for a classic look.

Manufactured with high concentrations of chromium and nickel, our Polished Marine Stainless Steel is grade 316 and offers extremely resilient, corrosion resistant properties, exceeding 1,000+ hours salt testing. This finish is an excellent choice for coastal locations and highly polluted environments.

Polished **BRONZE** - PBRZ

FOR INTERNAL & EXTERNAL USE

Polished Bronze is a bright, highly reflective finish with an abundance of character and warmth. This finish really pops when used in contemporary settings with bold colourways, adding visual interest and contrast.

Our Polished Bronze is manufactured from solid bronze containing a minimum of 85% copper. The finish is first aged, then repolished to create subtle contrast between the lighter surface areas and darker patina which gathers around the edges and recesses. To preserve the bright, reflective finish a durable lacquer is applied during the final stages of manufacturing.

Satin **MARINE** **SS (316)** - SSS

FOR INTERNAL & EXTERNAL USE

Our Satin Marine 316 Stainless Steel products are ideal for those looking for a hardwearing, low-shine finish. Its cool tones and lightly brushed surface make it distinctly contemporary, and works best when paired with lighter tones and subtle textures complementing clean, modern aesthetics.

Manufactured with high concentrations of chromium and nickel, our Satin Marine Stainless Steel is grade 316 and offers extremely resilient, corrosion resistant properties, exceeding 1,000+ hours salt testing. This finish is an excellent choice for coastal locations and highly polluted environments.

Polished **NICKEL** - PN

FOR INTERNAL & EXTERNAL USE

Polished Nickel is an excellent choice for those looking for a bright, reflective finish with warmth. This extremely versatile finish is best suited to contemporary interiors, but can also work well in more traditional settings due to its warm calming undertones.

Our Polished Nickel is a high quality chrome plating applied to solid brass. The subtle brassy undertones of this finish are a result of only one plating being applied, which offers a warmth that cannot be replicated with more modern, cooler chrome finishes.

Satin **CHROME** - SC

FOR INTERNAL & EXTERNAL USE

Satin Chrome is a beautifully understated, more subtle alternative to some of our polished finishes; its cool, blue traces and less reflective appearance make it a favourable choice for modern homes and interiors, yet it also works well in period properties where a contemporary touch is desired.

Manufactured from a base of solid brass with a high quality chrome plating applied to its surface, our Satin Chrome products are brushed with a satin wheel during the final stages of manufacturing, giving them their distinctive, matt appearance, before a high quality matt lacquer is applied to the surface for protection.

Polished **CHROME** - PC

FOR INTERNAL & EXTERNAL USE

Polished Chrome is a high-sheen finish that is ideally suited to modern interiors. Its bright, reflective qualities work well where a clean, minimalistic look is desired, while its cool tones complement bold colours and contemporary styling.

Polished Chrome products are made from a base of solid brass, with a durable, double chrome plating applied to the surface resulting in an exceedingly high-sheen finish.

Natural **SMOOTH** - NS

FOR INTERNAL USE ONLY

Offering versatility with a simplistic charm, Natural Smooth is a popular finish favoured for its natural tones and smooth texture which complements a range of architectural and interior styles, adding subtle aesthetic appeal without overpowering.

Our Natural Smooth finish is expertly hand forged from a base of cast iron, producing a beautifully smooth surface which is then finished with a clear matt lacquer, resulting in an extremely natural, enduring finish.

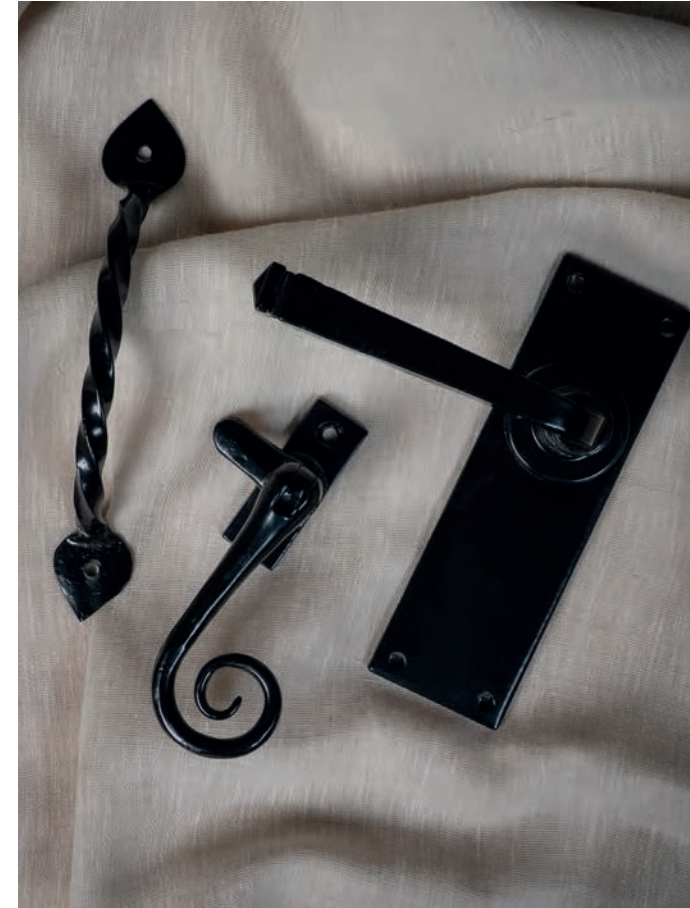

Pewter **PATINA** - PP FOR INTERNAL & EXTERNAL USE

This charming finish is well suited to characterful homes and interiors, where a more refined yet traditional look is desired. Pewter Patina products work beautifully when used with natural timbers and oak, but can also be modernised by pairing them with painted finishes in a variety of colours.

Hand forged from a durable base of steel, our Pewter Patina finish is an excellent example of how our unique manufacturing techniques add further detail to the natural charm of the base material. Pewter Patina products undergo an accelerated ageing process, creating a dark patina before being placed into barrelling machines, giving them the unique finish. During the final stages of manufacturing, a high quality, clear matt lacquer is applied for protection. A low maintenance finish, ideal for use in kitchens and bathrooms, or externally where damp conditions are expected.

Classic **BLACK** - BLK FOR INTERNAL & EXTERNAL USE

Our classic Black finish is the perfect choice for those looking to make a bold statement. This finish is best suited to traditional properties and interiors, and looks fantastic when paired with neutral colourways and natural materials such as timber, stone and tile.

Our Black products have a distinctive, subtle sheen. Hand forged from mild steel, this finish is extremely low maintenance, offering excellent corrosion resistance and durability as a result of being powder coated and baked in a high temperature oven during the final stages of manufacturing. An extremely low maintenance finish, ideal for use in kitchens and bathrooms, or externally where damp conditions are expected.

Antique **PEWTER** - AP FOR INTERNAL & EXTERNAL USE

Antique Pewter is a classic finish with industrial undertones and warmth; a slightly darker alternative to our Pewter Patina finish, but similarly versatile and well suited to a range of architectural styles and interiors thanks to its natural, understated notes.

Our Antique Pewter finish is a soft, aged finish created through a multi step process on a solid brass base. First the products are plated, then a patina is applied before they are hand-rubbed, highlighting details in the metal and giving the products a vintage, timeworn look.

Matt **BLACK** - MBLK FOR INTERNAL & EXTERNAL USE

Matt Black is an extremely versatile, timeless finish. Naturally, it looks great when used in ultra-modern settings, but can also be used to add a touch of sophistication and refinement to more traditional homes and interiors.

Our Matt Black products are forged from solid steel before being powder coated and baked in a high temperature oven which creates the subtle, black patina that emphasises the products clean silhouette. An extremely low maintenance finish, ideal for use in kitchens and bathrooms, or externally where damp conditions are expected.

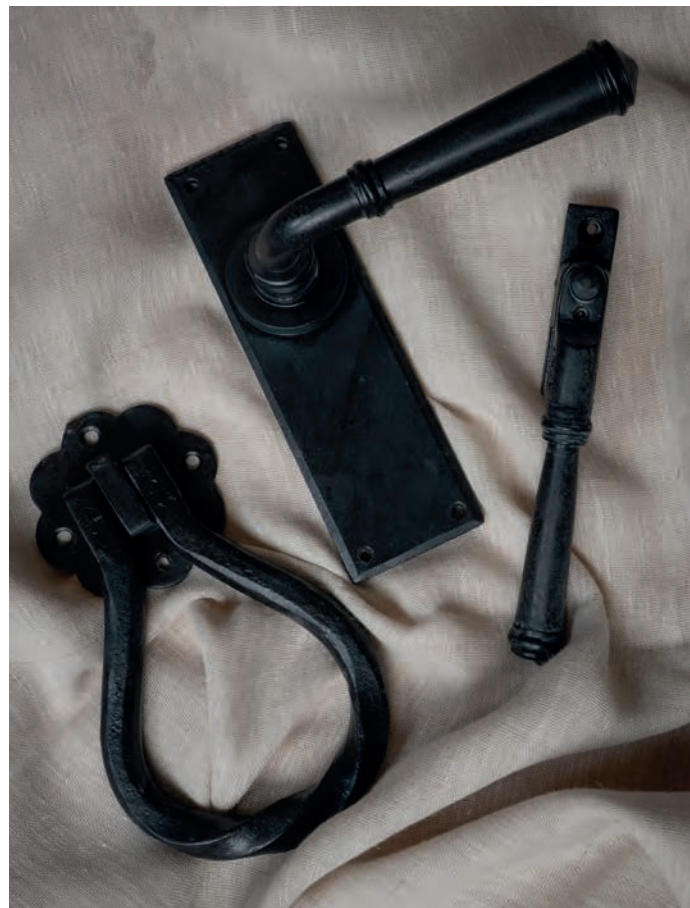

Rustic BEESWAX - BW

FOR INTERNAL USE ONLY

Beeswax is our most traditional finish with a soft, natural aesthetic featuring subtle blue and deep red ochre tones which are preserved in the steel during the manufacturing process; this finish is ideally suited to older, traditional dwellings and cottage interiors.

Beeswax products are hand forged from mild steel. Following forging, the subtle colours and character of the metal are preserved by dipping each piece in hot beeswax. This creates a soft, matt finish while providing excellent protection for products installed in internal environments.

External BEESWAX - EBW

FOR INTERNAL & EXTERNAL USE

Our External Beeswax finish aesthetically is the same as Beeswax; a traditional finish with a soft, natural look featuring subtle blue and deep red ochre tones which are preserved in the steel during the manufacturing process. This finish is ideally suited to older, traditional dwellings and cottage interiors.

Our External Beeswax products are hand forged from mild steel. After forging, the subtle colours in the metal are preserved by dipping the products in hot, anti-corrosive beeswax unique to From The Anvil. This results in a soft, matt richness and offers excellent protection when the products are fitted both internally and externally.

EBONY - EB

FOR INTERNAL & EXTERNAL USE

A rich, ebonised finish made from rosewood timber, Ebony looks beautiful when paired with Polished Brass or Polished Nickel, accentuating the contrast between the dark, dramatic tones of the wood and the highly reflective metals. A perfect choice for period homes and interiors.

The dark finish is achieved using a very traditional technique whereby a darkening solution is applied to the bare, high quality rosewood timber, which alters the tannins in the wood to create this rich, elegant finish.

ROSEWOOD - RW

FOR INTERNAL & EXTERNAL USE

Rosewood is an extremely popular choice in traditional properties. Characterised by its rich red hue and distinctive veining, adding visual interest, and offering a versatility where it takes on a more traditional identity when paired with Brass, or a more contemporary aesthetic when used with Nickel.

Our Rosewood products are manufactured from high quality rosewood timber, and waxed for protection, while also enhancing their distinctive colour and unique characteristics of the wood.

IRON - IRN

FOR INTERNAL USE ONLY

An extremely natural, raw finish with a rich depth of colour and a subtle sheen, our Iron products are ideally suited to traditional and industrial properties and interiors.

Our Iron products are cast from solid iron, highlighting the natural beauty and texture of the raw metal, which has a clear, protective lacquer applied during the final stages of manufacturing.

LACQUERED BRASS - LB

FOR INTERNAL & EXTERNAL USE

Lacquered Brass is a classic, simplistic finish which works well when paired with lighter colours and subtle textural details where a luxurious, more modern look is desired.

Manufactured from a base of solid brass with a quality lacquer applied to its surface. This finish is designed to avoid discolouration and oxidation, making it an excellent choice where a low maintenance finish is required and an enduring, bright polished finish is preferable.

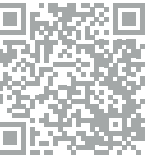

PVD BRASS - PVD

FOR INTERNAL & EXTERNAL USE

Offering the same classic, simplistic aesthetic as other Brass finishes, our Physical Vapourised Deposition Brass finish works well when paired with lighter colours and subtle textural details where a luxurious, more modern look is desired.

Manufactured from a base of stainless steel, our Physical Vapour Deposition finish (PVD) is designed to prevent discolouration and oxidation, making it an excellent choice where a low maintenance finish is required.

Window FURNITURE

Before deciding on the finish and style of window furniture, you must determine the type of window you have and therefore the correct ironmongery required. In this section, you can find out about each window handle type and select your preferred product from our vast collection. Once you have selected your window handles, you can match your chosen design and finish to external and internal door furniture too, creating a cohesive look throughout your home.

"match your chosen finish and design to external and internal door furniture, creating a cohesive look throughout."

Multipoint locking systems are usually fitted in uPVC or modern timber and aluminium windows for added security. This locking system requires an espagnolette handle as the spindle drives the multipoint lock, which usually secures the window at three points within the frame. The window can then be locked by turning the handle's grub screw. Window stays are an added option when using espagnolette handles, as they are not required to secure the window when closed.

and a 'right hand' fastener opens
anti-clockwise away from the
frame.

CASEMENT WINDOW FASTENERS

Window fasteners are suitable for use on more traditional windows that don't have an internal locking mechanism. Most fasteners are kept in place with a mortice plate that is recessed into the window frame, and are partnered with matching window stays. Windows with a central mullion use a fastener and hook plate, while fasteners that have a night venting facility use a wedge plate to allow the window to be held open. Some window fasteners are lockable by tightening the grub screw, which holds the fastener in a closed position. Security can be added to windows without a locking fastener by using window bolts or locking stay pins.

WINDOW STAYS

Window stays are used alongside window fasteners. A stay is an arm with evenly spaced holes that slot over pins to hold the window in an open position when required. When closed, the stay slots onto the pins to secure the window shut. These can be fitted with locking stay pins if additional security is desired.

Steel window furniture is used to operate, control and secure steel-framed windows. Our range includes window stays, fasteners, and associated fittings, all designed to work with the slim profiles of both modern and traditional steel windows. Fasteners are used to hold the window tightly closed, while stays allow the window to be held securely in a variety of open positions. Our fasteners include a night-vent option where controlled ventilation is required or desired, and our stays can be paired with a locking stay pin for additional security.

FANLIGHT WINDOW FURNITURE

Fanlight windows were traditionally designed to sit higher than standard windows to allow more natural light to flood interior spaces, with decorative detail to cast intricate shadows. Now also available in more modern minimalistic shapes and sizes, our collection of furniture comprises all the essentials for your fanlights, whatever the style.

Recognised for their decorative quality, sash windows consist of two panels that slide up and down, allowing the window to be opened and closed from both the top and the bottom. A sash fastener is required to secure the top and bottom sashes or panels together on what is called the mid-rail. Sash lifts are fitted to the bottom of a sash window, usually in pairs, and are used to assist in the lifting and closing of the bottom sash. Our extensive range of sash window furniture also includes sash eyes, offering an alternative to sash lifts, with all products designed to complement the other ironmongery throughout your home.

**Brighton Sash
Fastener
(Radiused)**

Image Ref.

The image shows two Brighton Sash Fasteners (Radiused) in detail. One fastener is shown from a side-on perspective, highlighting its L-shaped profile and the radiused top edge. The other fastener is shown from a top-down perspective, revealing the mounting holes and the internal mechanism. Both are made of a polished, yellowish metal.

Door FURNITURE

The front door has such an impact; it is crucial to choose a door style and accompanying furniture to suit your property. Much like your windows, before deciding on the finish and style of external door furniture, you must determine the type of doors you have and therefore the right ironmongery required for that door, and lock type. Most exterior doors, particularly front and back, must be lockable to protect your home.

Similarly, the ironmongery requirements for your internal doors will vary based on the location of the door within your property. For example, a bathroom door may require a locking

mechanism along with a lever handle to provide privacy, whereas you might opt for a sliding or pocket door in a room where space is more limited.

In this section, you can find more information about the different types of door furniture, enabling you to confidently determine the type you require before moving on to choose the preferred finish and style to carry throughout your home.

"Our extensive range offers a solution for all door types and applications"

Our refined collection of centre door knobs provides statement pieces for a range of applications. From charming country cottages to modern, minimalistic new builds, this range is both functional and fabulous. Centre door knobs are used as a decorative single knob, usually fitted to the centre of the door.

Our extensive collection of door knockers includes both traditional and contemporary designs across a wide range of our most popular finishes, suiting a variety of door and property styles. We offer options to suit narrower doors with glazing or panels, where there is typically less space to fit door furniture, as well as larger backplate options designed to make a statement on larger, more traditional front doors.

ESPAÑOLETTE DOOR HANDLES

Espagnolette handles are used in conjunction with a multipoint locking device, which is mounted on the vertical frame of an external door. The locking mechanism is operated via a spindle connected to a pair of espagnolette handles, which drives the multipoint lock and usually secures the door at several points within the frame. We offer a large range of both traditional and contemporary designs in our handles across our entire range of finishes, enabling complete coordination with the other ironmongery throughout your home.

MORTICE & RIM KNOBS

Mortice & mortice/rim knobs are fitted to the surface of a door. They ooze charm and character and are often found in period properties. Our weighty mortice/rim knob sets are available in a huge choice of designs and finishes. Many of our period door knobs are based on original Victorian designs and are perfect for an authentic restoration project or adding a touch of timeless design to a more contemporary interior. Our mortice knob sets have a fixed rose and can only be fitted with a mortice latch, whereas our mortice/rim knob sets have loose roses meaning they can either be used with a mortice latch or fitted with a rim lock.

THUMBLATCHES & LATCHES

Still a popular choice today, thumblatches are one of the most evocative pieces of ironmongery available, making them ideal for creating an authentic feel in any interior. Thumblatches are decorative door latches with a thumb-shaped lever. When this is pressed, it operates the thumb bar that passes through the door, which in turn lifts the latch on the opposite side, causing the door to open. Typically used on ledged and braced doors, they are perfectly paired with our collection of T Hinges.

Thumblatches are one of the most traditional products in our range and we recommend following our fitting guide video to make sure it all works perfectly.

HINGES

Our comprehensive hinge collection covers all requirements. Our butt hinges come in a wide selection of sizes and finishes for hanging anything from a kitchen cupboard to your doors and windows. The collection also includes decorative and specialist hinges such as butterfly, HL and H hinges, which are perfect for creating an authentic look. We also offer a selection of T Hinges as an alternative to a butt hinge. T Hinges are typically used in conjunction with a Suffolk Latch on traditional plank doors which are slimmer than solid or panelled doors and therefore can't be fitted with a typical latch or lock. Our range of traditional T Hinges can be used on anything from an under-stairs cupboard to a garden gate.

Door closers and intumescent are designed to ensure doors close correctly and maintain fire protection when closed. Door closers control the closing action of a door, ensuring it returns to the closed position after being opened, helping prevent draughts and improving fire safety. Intumescent products are fitted within the door alongside locks and hinges, expanding when exposed to heat to seal any gaps, improving resistance to fire. When used together, door closers and intumescent help to make sure doors perform as intended, particularly in fire-rated applications.

Sliding doors and pocket doors are a great way to save on space as you don't have the usual door swinging open into or out of a room. Your ironmongery is flush fitted to the surface of your sliding or pocket door.

Cabinet FURNITURE

Our range of cabinet furniture caters to all property types, whether they are traditional, contemporary, or somewhere in between. Often, traditional kitchens are fitted with revealed hinges and cupboard knobs, whereas more contemporary spaces are suited to cup pulls, bar handles or edge pulls. Our entire cabinet furniture range can be matched to your existing furnishings to provide continuity throughout your home.

"you should be thinking about the ironmongery from the very start of any project"

CABINET KNOBS

Our extensive collection of cabinet knobs can be used in many ways. Whether you are refurbishing furniture, fitting wardrobes or installing a new kitchen, our choice of ironmongery will add the perfect finishing touch. We offer a vast choice of styles and finishes, including hand-forged products that sit well in rustic country homes, timeless period designs, and clean, contemporary styles for more modern settings.

One of the most expensive decisions we make in our home is designing a kitchen, so getting the choice right for your cabinet furniture is essential. Our range caters for country cottages all the way through to modern and minimalistic homes.

CABINET PULL HANDLES

We manufacture pull handles in a large variety of styles and sizes for use on kitchens, wardrobes or doors. Our signature gothic and bean style pull handles are forged from a single piece of steel and are at home in any barn conversion or country cottage. If you are looking for something suitable for a more modern setting, we also offer a selection of contemporary designs in a range of our most popular finishes.

DRAWER & EDGE PULLS

Our drawer pulls come in many finishes and cater to any look. Choose our concealed pulls for use in modern interiors or opt for face-fixed pulls where a more traditional look is desired, and pair with our cabinet knobs for a cohesive finish.

Our contemporary range of edge pulls is ideal if you're looking for an ergonomic yet minimalistic solution for your kitchen or cabinetry. These discreet handles sit on the top edge of a door or drawer, enabling you to open and close them with ease whilst maintaining a clean and contemporary aesthetic.

Ancillaries & ACCESSORIES

We offer a wide-ranging collection of ancillaries and accessories to finish off any project to the highest specification. For the perfect finishing touches, alongside your door, window and cabinet furniture, your practical items should all be aesthetically pleasing and of good quality too.

For a cohesive look throughout your home, match the finishes of your existing ironmongery with that of your accessories, or, to create interest, mix and match finishes from our range that complement one another.

"to create interest mix and match finishes from our range that complement each other"

ESCUICHEONS

Designed to complement our mortice knob and lever on rose designs, our escutcheons are used to decorate keyholes, adding the perfect finishing touch to any locking door. Use our standard escutcheons for sash locks or opt for a euro escutcheon for modern euro cylinder locks.

SHELF & HANDRAIL BRACKETS

With both practical and decorative uses these products are all hand-forged by craftsmen and women and therefore create a unique product each and every time.

Our collection of traditional shelf, handrail and mending brackets combines strength, functionality and timeless style. Create beautiful open shelving with our decorative shelf brackets, add character to timber staircases with our handrail brackets, or reinforce traditional doors and windows with our mending brackets. Each design offers dependable support while enhancing the period charm of your home.

Euro cylinders are the locking mechanism used within doors that are fitted with either euro lock handles, espagnolette lock handles or euro escutcheons. The cylinder sits inside the lock case and is operated by a key, allowing the door to be securely locked and unlocked when required. Our euro cylinders are designed to work alongside multi point locks, euro sash locks and euro dead locks to provide a consistent aesthetic and security throughout the home. Options are available for a variety of requirements including different door thicknesses, keyed-alike and keyed-to-differ options, or thumbturn options where key-free internal operation is preferable.

Curtain furniture can often be left until last when decorating a room but is always an integral part of any design. Match your finishes here to the ironmongery choices throughout your home.

Our range of care and maintenance products are used to protect and enhance the performance and finish of our ironmongery. Our range includes waxes, oils, cleaning solutions and touch-up products, all designed to maintain and enhance the look and longevity of both our internal and external hardware, while ensuring they continue to perform and look their best over time.

Pendant & Wall LIGHTING

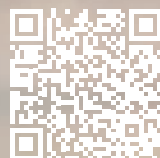

Our elegant collection of ceiling pendants, wall lights and cluster pendants provide a simple solution for illuminating and elevating your space.

Available in a wide selection of colours and finishes, our lighting is hand-spun from raw materials and each product is made to order. Due to the bespoke nature of these products, we are also able to offer custom colours and finishes upon request.

See our full lighting collection, including all finish and colour options, dimensions and technical information, on our website.

"We're passionate about the products we produce and focus on high-quality manufacturing"

PENDANT LIGHTING

Our stunning ceiling pendants are available in five striking designs. Choose from industrial-inspired Brindley, Harborne & Hockley, feminine Flora or contemporary Frankley. All our pendant shapes are available in our 12 signature, nature-inspired colours and a further 8 bare metal finishes, offering something to suit every space.

WALL LIGHTS

Pair our Brindley and Flora wall lights with matching pendants to create a striking feature in any room. Our signature Brindley and delicate Flora offer a matching, smaller version to the pendants, and are available in all the same colour and metal finishes.

CLUSTER LIGHTS

Available in our signature Brindley and delicate Flora designs, our cluster pendants are as eye-catching as they are versatile, and look fantastic when paired with matching wall lights.

Home & GARDEN

Attention to detail and exceptional craftsmanship were at the forefront of our minds when developing this range of Home and Garden products, designed to enhance and complement customer homes whilst offering consistency with existing hardware used from our other product collections.

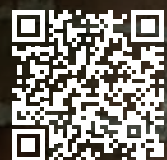

The artisanal nature of these designs means no two items are identical. However, each one offers the same durability and elegance expected from our products, so you can enjoy them for years to come.

"we give you a choice of beautiful products to enhance and complement your home, offering consistency throughout"

PLANTPOTS & VASES

Our elegant flowerpots are the perfect home for your plants, both indoors and outdoors. From the classic Flora to the contemporary Hepworth and Newlyn, our pots are available in a selection of our most popular finishes.

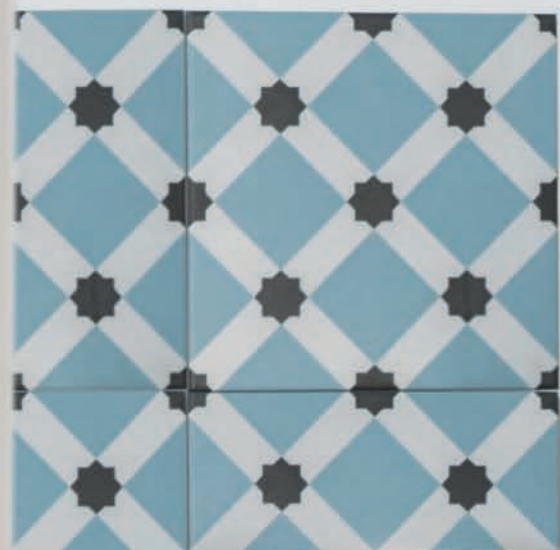

FIRESIDE ACCESSORIES

Our stylish log holders are designed to keep your firewood organised, accessible and beautifully displayed. Pair them with our carefully curated collection of companion sets to enhance your fireplace and add an elegant touch to your living space.

BASINS

Add a touch of sophistication to your space with our stunning collection of Smooth and Hammered basins. Designed to suit both traditional and modern interiors, our basins combine timeless design with modern functionality, bringing warmth, elegance and enduring quality to any space.

BOOT RACKS

Our practical boot racks are intended to keep your footwear organised and your floors clutter-free. Each piece is meticulously hand-crafted from a mild steel base material to create a sturdy yet tasteful storage solution.
